INTRODUCTION

The entrance examination programme covers a range of issues that specify the requirements for the knowledge and skills of a person applying for the Master's programme at the University of Banking in order to obtain an academic master's degree in program subject area 073 "Management".

The programme is compiled on the basis of the disciplines of the cycle of professional training of bachelors in management, economics and entrepreneurship, provided by the corresponding educational and professional programmes of preparation of bachelors. At the same time, the programme contains the questions that must have been covered by the cycle of disciplines of general economic preparation, particularly the economic theory (micro and macroeconomics).

The exam programme in the specialty has an interdisciplinary synthetic character, and is organised according to the modular principle:

Module 1. Economic theory.

Module 2. Economics of enterprise.

Module 3. Management.

Modules of the programme reflect the individual aspects of economic and managerial activities and combine knowledge of certain disciplines. At the same time, theoretical and practical questions and materials of an operational character are organically combined there that allows to reveal the knowledge and ability to use categorical apparatus, analytical thinking, methods of substantiation and calculation of certain functions of management of economic activity of an enterprise in the conditions of domestic and international economies.

The test consists of fifty tasks. Each task has four variants of answers, where the only one is correct. Each correct answer carries 4 points. Each wrong answer carries 0 points. The maximum number of points is 200.

The test is deemed passed on condition that a test taker has scored at least 100 points.

PROGRAMME
